# Retrieve Mapper Data From Flash Card

Press circled button to remove flashcard. The card will only go in one way in the PLC when you re-insert the card after data retrieval.

Use a flash card reader connected to your computer to retrieve data.

Make sure it is inserted correctly or it will not read. If it does not read flip it over and insert again.

Once the card is inserted correctly and you have clicked on one of the

USB Drive (I:)

USB Drive (J:)

USB Drive (K:)

drives USB Drive (L:) **displayed in Windows Explorer you will see.**

Name	Date modified	Type
ARCHIVE	8/16/2018 11:33 AM	File folder
LANEDATA	8/16/2018 12:11 PM	File folder
SLABCALB	6/3/2013 4:09 PM	File folder

Double click on LANEDATA to see the raw lane mapper files. Example below.

Name	Date modified	Type	Size
LANE0037.CSV	8/16/2018 11:40 AM	Microsoft Excel C...	32 KB
LANE0038.CSV	8/16/2018 11:49 AM	Microsoft Excel C...	32 KB

Copy the files to a location on your computer. These files will be needed when converting the raw CSV files ("Convert Lane Mapper Files" screen) into an xml file that can be read for reporting.
